DETAILED ACTION

1. The following is a notice of allowance for application number 09/709,989. Claims 1-28 are pending and have been examined on the merits discussed below.

Drawings

2. The drawings filed on April 16, 2003 are acceptable subject to correction of the informalities indicated on the attached "Notice of Draftsperson's Patent Drawing Review," PTO-948. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.

Allowable Subject Matter

3. In light of the most recent remarks submitted by the applicants, claims 1-28 allowed.

4. The following is an examiner's statement of reasons for allowance: The prior art taken alone or in combination fails to teach the claimed invention set forth in claims 1-28. Specifically, the invention set forth in independent claims 1, 10, 19 and 20 are directed to a method, system and computer program for determining a ratee reputation by weighting a combined rating by an amount equal to a shortest length of a rating path determined from a breadth-first search. The closest prior art, Zacharia's "Collaborative Reputation Mechanisms in Electronic Marketplaces", teaches considering paths that do not exceed a maximum length and weighting the reputation based on the number of paths, but does not teach considering the shortest length between entities and weighting the combined rating by an amount according to the shortest length.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
